What exactly is the difference between 4D and 4Music 7 in terms of quality? I was thinking of buying the 4D but will look into 4Music 7 because I know 4Music 8 is out and has better features for sure but then again I just want to get what I should get. EDIT: Just saw the "Sound quality" is only in 4Music 7. I didn't notice it in 4D. It says for 4Music 7 "Mediabox 2.0", I don't know what that is but I know in 4D I got the "MediaCore 4.0". That's the same thing isn't it? What exactly is the difference between 4D and 4Music 7 in terms of quality? That's the same thing isn't it? Does anyone know what is mediabox 2.0 in 4Music 7? Hi, I haven't used 4Music 7, so I can't speak about that. What I can tell you is this: 4Music 5 was the first release of Audiotracker v. 4. 4Music 6 was the first release of the new Audiotracker v. 5. Audiotracker v. 4 uses MediaCore 2.0. Audiotracker v. 5 uses MediaCore 5. MediaCore 2.0 is what's available in 4Music 7 as the "Sound quality" you're talking about. MediaCore 5 is what's available in 4Music 8 as well as in the Multiformat 8 versions. So, 4Music 8 is the first release that uses MediaCore 5. Hope that helps.
